EDUCATION

University of Cincinnati **Graduating: May 2028**
Bachelor of Science, Computer Science | Minors: Mathematics, Statistics, Chemistry | GPA: 3.3

- Relevant Coursework: Algorithms, Data Structures, Computer Systems, Probability, Statistics, AI/ML, Nanoscience

SKILLS

Programming: Python, C++, C, C#/.NET, TypeScript/JavaScript, SQL, MATLAB, PowerShell, Bash
AI/ML & Data: MNE-Python, pandas, NumPy, scikit-learn, feature engineering, evaluation, vision-language model testing
Software & Systems: Git/Gitea, Docker, Linux/Unix, Kamal, FastAPI, PostgreSQL, REST APIs, CI/CD, tunnels
Tools & Research: Python/Qt, Windows Forms, Collabora/WOPI, Autodesk Fusion certification, CITI GCP, CITI HSR Core

EXPERIENCE

Cincinnati Children's Hospital | Student Researcher / Software Developer **May 2026 - Present**

- Restored a production-like development environment on the CBL server in a separate branch; rebuilt containers and Kamal deployment, then configured reverse tunnels and proxy/host/port routing for testing.
- Enhanced AutoClean EEG (Python/MNE, Qt) with provenance summaries, prior-processing checks, and ASSR validation; fixed autosave, exports, and tunnel errors while preserving condition labels and ICA reports across epoch/BIDS workflows.
- Designed EEG artifact-classification experiments on 679 human-labeled components, comparing vision-model prompts/layouts with ICLabel using subject-clustered scoring. Batched review from 127 API calls to 6, cutting requests 95% with 89% expert-label agreement; added JSON validation, retries, and automated tests.
- Streamlined AtomicQMS, a Gitea-backed QMS, with lab users; clarified controlled-document, revision, and change-request workflows and removed a redundant runner test while retaining approval, branch-protection, publishing, and REDCap safeguards.
- Dogfooded AtomicQMS and interviewed pilot users and project coordinators ahead of a gene-therapy research launch across dozens of hospital labs; translated usability issues, IRB and organizational approvals, templates, and repository needs into product changes and rollout requirements.

BMW Manufacturing | Purchased Parts Quality Management Intern **Aug 2025 - Dec 2025**

- Led three daily cross-functional meetings, aligning Powertrain, Interior, and Exterior stakeholders across day and night shifts on quality priorities, blockers, and follow-up actions.
- Organized G65 launch alignment across Powertrain, Interior, Exterior, and day/night shifts; surfaced concerns, clarified owners, and coordinated follow-up ahead of launch.
- Created dashboards for internal MN-84 meetings to show KPI changes over the prior 24 hours; built two C++ scheduling tools that converted staffing constraints into Saturday coverage plans.
- Interviewed users and dogfooded an underperforming system; documented UI and database issues, then presented qualitative findings, change recommendations, and likely stack impact to its developers in Germany.

PROJECTS

Taiwan MATLAB Collaboration GUI | C#/.NET, Windows Forms, Git **Jul 2026 - Aug 2026**

- Built a desktop GUI for a research lab's MATLAB codebase, centralizing editing, version history, change comparison, and a scientific test workflow after code had been scattered across multiple PCs.
- Translated Git into researcher-friendly diffs, protected branches, syncs, save points, and PR-style handoffs; added path validation, external-change detection, and conflict-aware file operations.

Regression Study Room | TypeScript, Next.js, Gemini API

- Built an interactive statistics learning app that used Gemini-generated practice and feedback to help students work through regression concepts in an iterative study workflow.

ACTIVITIES

University of Cincinnati | CEAS Ambassador

- Led tours of CEAS buildings and labs, showcasing campus research and engineering resources to students and families.

University of Cincinnati | Teaching Assistant, ENED and Summer Bridge Scholars

- Guided ENED and Summer Bridge Scholars in introductory engineering coursework, project work, and campus resources.

AWARDS & HONORS

Full-Ride NSF S-STEM Scholar | Choose Ohio First Scholar | NACME Scholar

AVAILABLE FOR INTERNSHIP: SPRING 2027 | FALL 2027 | SUMMER 2028
